### Corvette Base Price over the years

### Winter Storage Tips

- Wash, dry and wax.
- Change oil & filter.
- Check antifreeze
- Over Inflate tires to about 45 PSI and set tires on thick carpet pieces.
- Add a good gas stabilizer to fuel tank
- Install Battery Tender. No need to remove or disconnect the battery.
- Add Moth balls (in several small pantyhose type footies) under the hood. This keeps mice away from nibbling on hoses, rubber parts, sparkplug wires, etc.
- Place fabric softener sheets in the foot wells and rear area. This is thought to discourage small varmints or mice. Even if it doesn't, the car will smell nice.
- Unhitch the top latches on convertibles so that the top is relaxed for the winter.
- Remove any freezable liquids you may have in your storage compartments.
- Block tail pipe openings to keep mice or red squirrels from nesting. Steel wool is a good choice or tuperware caps if they fit tight.
- Another good option is to put a vinyl tarp on the ground or garage floor under your car, even if it's cement. Moisture rises through the floor and the tarp will help prevent condensation on your undercarriage.
- Put on a good car cover and wait for Spring.

### Reading Diagnostic Trouble Codes (DTC)

All C5's have the ability to display Diagnostic Trouble Codes on the Driver Information Center (below instrument cluster). Other models require an OBDII code reader connected to the diagnostic connector.

1. Turn the key to the ON position, but don't start the engine.
2. Clear any present messages by pressing the RESET button.
3. Hold the OPTIONS button down, and press the FUEL button 4 times. This will get you into the CODES section of the Driver Information Center (DIC) below instrument cluster.

The computer will automatically display all the codes your car has generated. It will cycle through each code every 3 seconds. Any code that ends in H is a history code (something that has occurred in the past).

Once the computer has finished stepping through all of it's codes, press RESET to enter Manual Configuration mode. It should start with a module and either display "NO CODES" or "number of CODES".

#### To reset the codes – optional - if you wish to clear codes

1. When a code is displayed in the manual mode press and hold RESET until it displays "NO CODES".
2. Press OPTIONS to go to the next module.
3. Repeat these steps until you have reset the codes in all the computer modules.
